

Volnay 1er Cru Santenots

- **Geography :** It is the **Santenots du Bas**, at the same level of the hill than **Ronceret**. The beginning of the plot has a soft slope that breaks in the middle and finish flat.
- **Soil and environment :** The ground is deep and rich, with dark red colors due to the high iron content. The "ship heads" can be found there (big round rocks).
- **The vine :** Blend of young vines (20 years old) located on the sides of Volnay with bigger rocks and older vines (60-70 years old) from Meursault with a clay soil.
- **The wine :** Dense and intense from the beginning with some animal notes those other wines don't have. Subtle on the palate, (old vines) relayed by length and strength in the mouthfeel. It is more on the Côte de Nuits than on the Côte de Beaune side.
