

Château Mondésir

Area : Bordeaux
Appellation : Blaye Côtes de Bordeaux
Color : Red
Soil : Clay-limestone
Planting density : 5.500 plants/ha
Yield : 40 hl/ha

Grapes : Merlot 100%

The Merlot grape variety produces small berries with aromas of red fruits, strawberry, raspberry, plum, and blackcurrant. It thrives in the fresh clay-limestone soils found on the right bank of the Gironde river. It produces a pleasant, rounded wine.

Breeding : 18 months in concrete tank

Tasting comments :

The color is dense and purplish. On the nose, the Merlot shows its ripe fruit aromas. On the palate, the distinctive clay-limestone soil character of Plassac is reflected in its powerful and expressive character.
