

François Mikulski

BEAUNE Sur les Grèves

Vine

The surface area is 12 ares and 55 centiares, equivalent to 3 ouvrées. It is planted in an area traditionally used for red wine, just above Les Teurons, at the foot of the city reservoirs in Beaune.

It was purchased in the 1930s by Marie-Pierre's great-great-grandfather, Pierre Germain, and cultivated by the family before being replanted by François and Thomas in 2020.

The soil

The decision to plant white grapes was due to a seam of white marl at this location, which is favourable for Chardonnay. It is classified as a Beaune Premier Cru.
