

François Mikulski

Monthélie Les Toisières

Located at the entrance to Monthélie village; on a south-west facing slope.

Vine

The vines are about 40 years old.

The soil

Les Toisières was once a quarry, where flat stones were extracted for roofing.

Clay-limestone terroir, producing elegant wines with fine tannins.

Maturation

The cuvée is vinified in vats for about 15 days; it is then placed in barrels, where it remains for at least 18 months. We use about 20% new barrels.
